Availability: Immediate Joiner

SUMMARY

Java Full Stack Developer skilled in Java, Spring Boot, React.js, and MySQL. Built a full-stack catering booking platform (Feast & Fete) with microservices architecture, JWT-based authentication, role-based access control, and Razorpay payment integration. Strong foundation in REST API design, database modeling, and scalable backend architecture.

Technical Skills

Languages: Java (Core & Advanced), JavaScript,SQL, HTML5/CSS3
Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, React.js, Microservices
Databases: MySQL (Schema Design, CRUD, Joins)
API & Authentication: REST APIs, JWT Authentication
Tools/Testing: Git, GitHub, Postman, Maven, VS Code
Concurrency: Java Multi-threading, Task Management, Synchronization

Currently Upskilling In

Unit Testing (JUnit & Mockito), Docker, CI/CD (GitHub Actions), AWS Fundamentals (EC2, S3, RDS)

Soft Skills

Problem-Solving: Strong analytical and logical approach to breaking down complex requirements.
Communication : Clearly documents and explains technical decisions to peers and stakeholders.
Troubleshooting: Efficient in identifying, debugging, and resolving technical issues across the stack.

Experience

Student Micro Loan System | ***Associate Backend Developer Intern*** March – June 2026
CodeTikki

- Designed backend microservices for a student micro-loan platform, implementing a phased disbursement system — Wallet Credit (live) and UPI Transfer (planned)—ensuring regulatory compliance and low operational risk.
- Engineered a rule-based eligibility & credit evaluation engine using platform activity data (quiz scores, streaks, engagement) as a proxy for creditworthiness, classifying loan applications as Approved, Partially Approved, or Rejected.
- Developed a full repayment lifecycle (Active → Due → Overdue → Closed) with automated reminders, late-fee penalties, and fraud detection (duplicate accounts, suspicious activity flags).

Projects

Feast and Fete: Full-Stack Event Catering Platform | *Web Full Stack Development* March – May 2026

- Designed and developed a full-stack catering booking platform using Java, Spring Boot, React.js, and MySQL, following a microservices architecture with independent Auth, Profile, and Booking services connected via an API Gateway.
- Implemented secure JWT-based authentication with role-based access control (RBAC) for Admin, Organizer, and Customer modules, including token generation and protected route validation.
- Built organizer profile management and customer booking features, enabling organizer comparison, menu/pricing display, and catering booking requests.
- Integrated Cloudinary for image management and Razorpay Payment Gateway for secure online payments with real-time status tracking.
- Designed and documented 8 REST API endpoints and conducted functional testing across 9+ test cases, achieving 100% pass rate.
- Tech Stack: Java, Spring Boot, Microservices, Spring Security, JWT, React.js, MySQL, Razorpay, REST APIs.
